Email:anumalar2006@gmail.com

PROFILE SUMMARY

Aspiring ECE student with a strong grasp of C and Python programming. Keen to apply theoretical knowledge in a real-world environment through an internship. Interested in learning and contributing to software development, embedded systems, and innovative engineering project

EDUCATION

Bachelor of Engineering (B.E.) in Electronics and Communication Engineering

Sona College of Technology

Year:2024-2028

CGPA: 8.43

Higher Secondary – Holy Angels Matriculation Higher Secondary School

Secondary (10th) – Holy Angels Matriculation Higher Secondary School

AWARDS AND ACKNOWLEDGEMENTS

Participated in Smart India Hackathon (SIH) – Gained hands-on experience in problem-solving and innovative solutions.

Participated in Techathon – Showcased technical skills and collaborated in a team-based competition.

Completed Machine Learning Workshop – Learned practical applications of ML concepts and tools.

SKILLS DEVELOPED

🔧 Microcontroller system logic and program execution flow

🔧 Software implementation of electronics-based control logic

🔧 Efficient coding practices for performance-aware applications

🔧 Debugging across software logic and hardware behavior

🔧 Conversion of real-world electronic signals into software conditions

✧ Strong analytical, logical, and algorithmic thinking

✧ Adaptability of core electronics knowledge to software development task
